## LOW-WATER/DROUGHT-RESISTANT PLANTS

Using low-water and drought-resistant plants can significantly reduce your outdoor water usage. The plants listed below are appropriate for California's climate and use less water than what you may already have in your garden.

This list is a good representation of low-water consuming plants that are easily available. Check with your local nursery for their suggestions about what is best suited to your area.

### PERENNIALS, SHRUBS & ORNAMENTAL GRASSES

- Agave species (Agave)
- Alyogyne huegelii (Blue Hibiscus)
- Arctostaphylos species (Manzanita)
- Artemisia species (Sagebrush)
